# Overview

---

If you are a Department of Veterans Affairs (VA) provider, the Immunization Campaign mobile application (App) gives you a record of and information about your patients' influenza (flu) immunizations. The App lets you review and document immunizations on the go and streamlines the process of vaccine administration to multiple patients in a short period of time during an immunization campaign. It includes information about your patient's immunization history and contraindications or precautions for flu vaccines (any medical reason why a patient should not get a specific vaccine). The App also lets you quickly record into a patient's vaccination record any vaccines you administer, along with the immunization lot (manufacturing) number for those vaccines (dose, site, etc.), and vaccines patients refuse or have already received in a different clinical setting.

This App is available for iOS, Android and Windows operating systems but will only be available through government-furnished equipment (GFE) mobile devices. This user manual provides a comprehensive summary of the in-depth, step-by-step user guide that is built into the Immunization Campaign App.

# The Basics

## Prerequisites and Setup

To use the Immunization Campaign App, you must:

1. Be a VA provider with Veterans Health Information Systems and Technology Architecture (VistA) credentials. **NOTE:** Only users with a valid electronic signature code can save data to the VistA database.
2. Have a GFE mobile device with a screen the size of a tablet or larger. **NOTE:** The Immunization Campaign App is not recommended for use on smartphones due to the level of detail in the App.
3. Be connected to the VA intranet network.
4. Have access to VA's computerized patient record system (CPRS) outside the Immunization Campaign App in case you need to view or enter patient information other than vaccine records. The Immunization Campaign App allows you to enter information into a patient's VA vaccination record only. **NOTE:** CPRS functionality is available through the Patient Viewer App, which should also be loaded onto your GFE mobile device.
5. Have access to the current procedural terminology (CPT) codes published for the current flu season. The proper CPT codes must be entered into the encounter information for the visit to receive workload credit for the immunization. Please refer to Appendix #3 – CPRS Prerequisites for the full list of CPT codes.

The Immunization Campaign App is designed to streamline the process for influenza immunization campaigns and let you perform all the necessary steps to document the administration of a flu vaccine from the convenience of your mobile device. However, it may still be necessary to cross-reference information from the App against other resources.

While using the App during a patient appointment, please ensure you have the following on hand:

1. Physical copies of the Vaccine Information Statement (VIS), published by the Centers for Disease Control and Prevention (CDC), to give the patient
2. The physical vial/box of the vaccine, to verify trade name, lot number and expiration date
3. Package inserts published by the vaccine manufacturer or another source of definitive information to determine if the vaccine formulation contains latex.

## Logging in

When you access the Immunization Campaign App, you will first see the Provider Login screen. Enter your VistA Access Code > Enter your VistA Verify Code > Begin typing in a VA Station > A list of matching facilities will appear in a drop-down list > Tap Sign In.

## Getting to know the screen

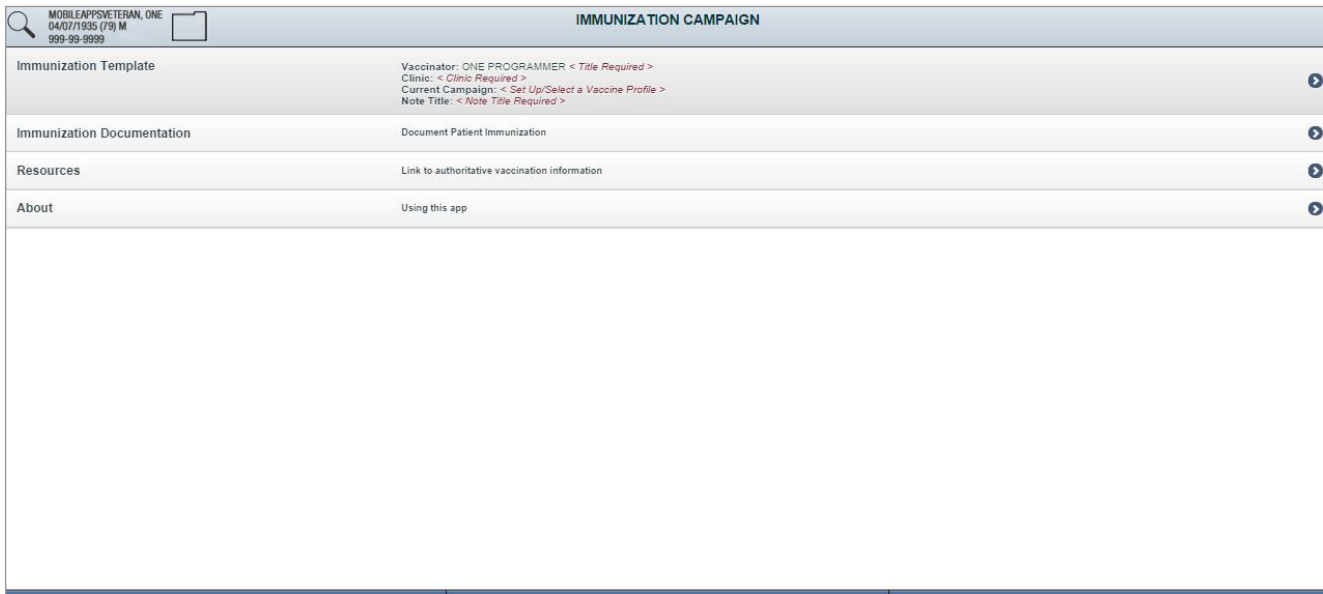

When you access the Immunization Campaign App, you will see the Home screen, which will provide four main menu choices:

1. Immunization Template – enter data into the Immunization Template
2. Immunization Documentation – enter or view patient immunization data
3. Resources – find more information on current immunization guidelines
4. About – view the step-by-step user guide built into the App

Tap the menu item or the arrow at right to explore each section further.

You will also see information about the patient whose record you are viewing:

- Search feature – in the upper left corner with a magnifying glass icon that allows you to search by patient name or Social Security Number (SSN)
- Patient file – in the upper left corner next to the file icon with the patient's name, date of birth, age, gender and Social Security Number

## Returning to the Home screen

You can return to the Home screen at any time by tapping the **Home** tab at the bottom of the screen. **NOTE:** The header for the Home screen reads Immunization Campaign.

## Returning to the VA Launchpad

Tap the Launchpad tab at the bottom of the screen.

## Logging out

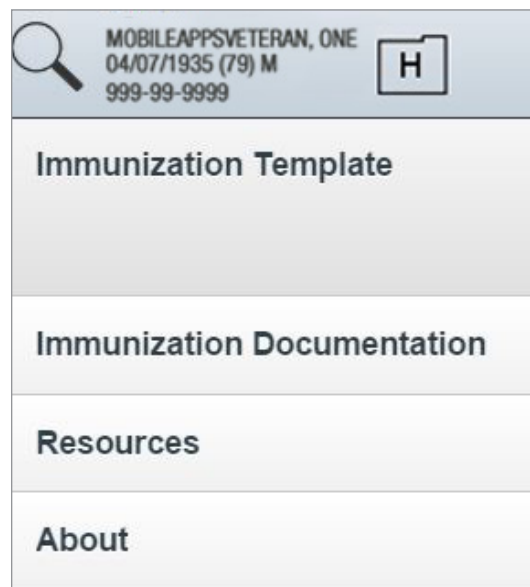

Tap the Logout tab at the bottom of the screen.

# Patient Search

Quickly find information about a patient by searching the patient's name or SSN.

## Searching for a patient

Tap the magnifying glass icon in the upper left corner of the screen > Type the name of your patient or full SSN in the form XXX-XX-XXXX > Press enter > A list of matching results will appear in a drop-down list > Tap the name of the patient you would like to view > A pop-up box with the patient's basic information (last and first name, date of birth, age, gender, location receiving care and Social Security Number) will appear > Tap **Select Patient** to switch to the selected patient's record.

# Patient Details

After you've found the patient whose information you would like to view, you can readily access an overview of his or her data.

## Reviewing a patient's information

After you've selected your patient, his or her name will appear in the upper left corner of the screen, alongside a file icon and a quick reference of the patient's identifying information:

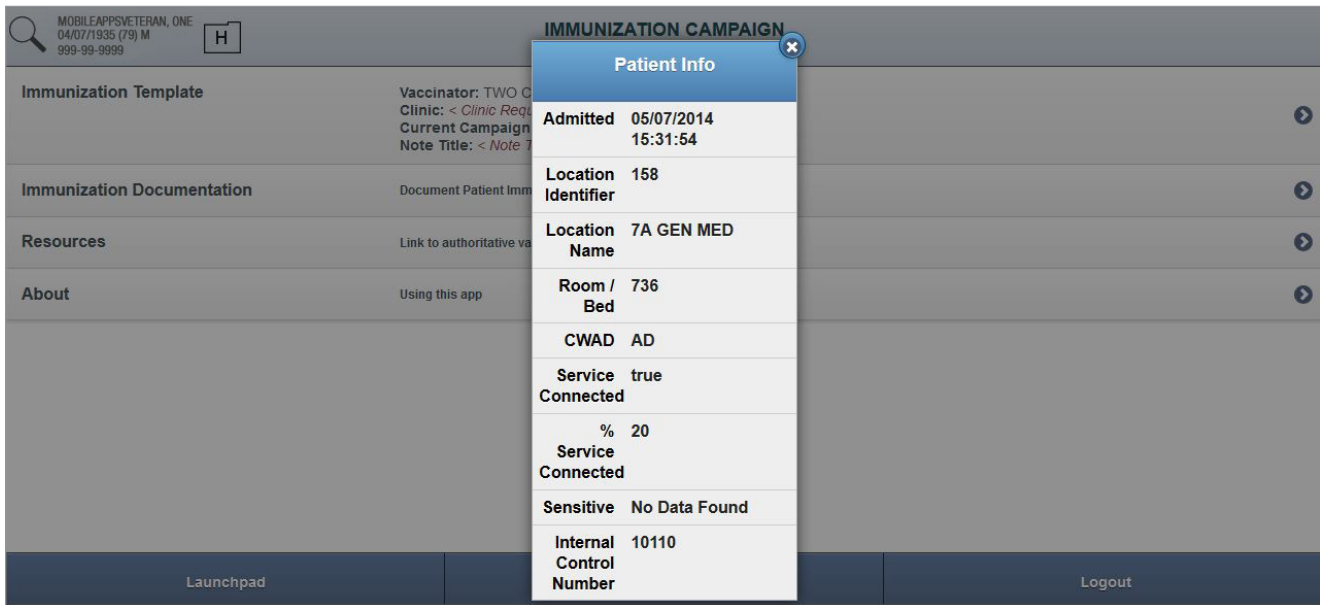

- Last name
- First name
- Date of birth
- Age
- Gender
- Social Security number

To view more detailed information, tap the file icon > A pop-up box with your patient’s information will appear that includes:

- Admitted – date and time admitted to the facility (only shown if the patient is currently admitted - i.e. Inpatient status)
- Location Identifier – number assigned to the VA facility (only shown if the patient is currently admitted - i.e. Inpatient status)
- Location Name – name of facility where patient is receiving care (only shown if the patient is currently admitted - i.e. Inpatient status)
- Room / Bed – detailed location within a VA facility (only shown if the patient is currently admitted - i.e. Inpatient status)
- CWAD – crisis, warnings, allergies and/or adverse reactions and directives
- Service Connected – notes about service-related conditions
- Percent Service Connected – percentage of patient’s disability according to eBenefits requirements
- Sensitive – indicates that the record is sensitive and may only be viewed by authorized users
- Internal Control Number – Internal Entry Number used to identify a patient entry within VistaA

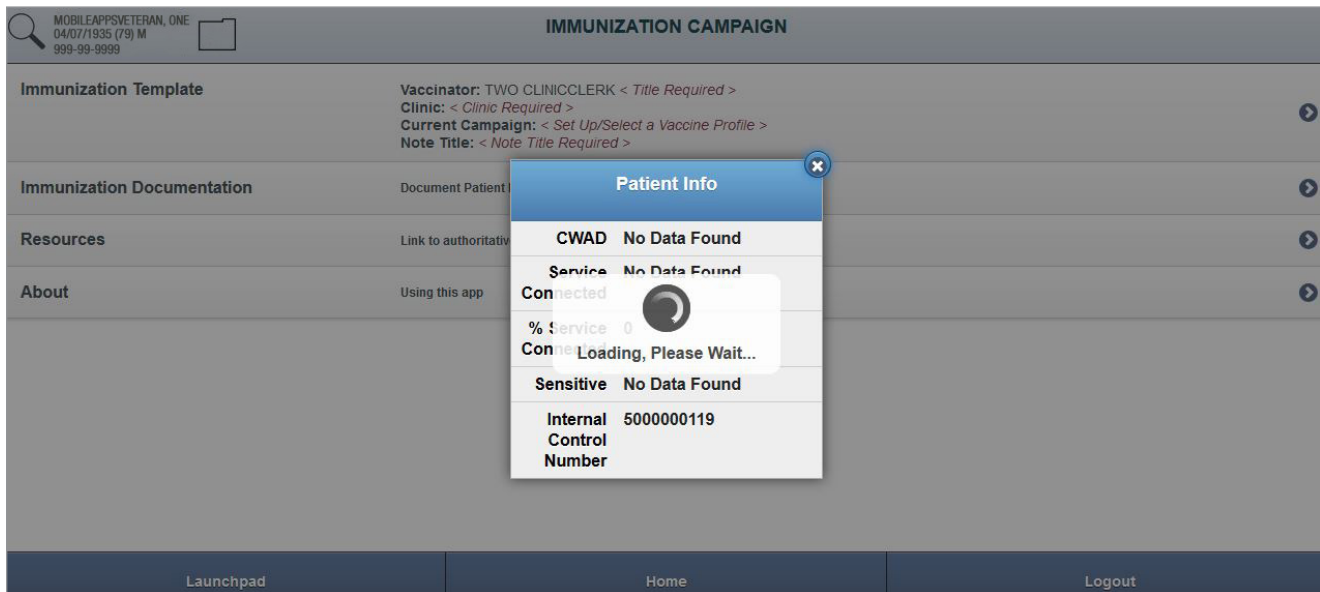

To close the Patient Information box, tap the **X** in the upper right corner.

### ***Patient info with Inpatient status***

### Patient info with Outpatient status

## Setting Up the Immunization Template

Using the Immunization Template saves you time, allowing you to set and reuse the background information for a vaccine. By inputting the required data for a vaccine once during an influenza immunization campaign, the template will auto-populate the required background information the next time you administer the vaccine instead of requiring you to re-enter the vaccine data for each patient. **NOTE:** You must enter the vaccine data first and check the box in the Use in Campaign column before you can apply it to a record of administering an immunization to a patient.

### Navigating to and from the Immunization Template

Tap **Immunization Template** on the **Home** screen, and you will go to the Immunization Template screen, where you can enter general information about a vaccine. To return to the Home screen, either tap the **Back** button (with the arrow icon) in the upper left corner of the Immunization Template screen, or tap the **Home** button at the bottom of the screen.

### Sections of the Immunization Template

The template has three sections:

1. Vaccinator
2. Location & Note Title
3. Vaccine Profiles

## Vaccinator

There are two fields in the Vaccinator section of the Immunization Template: Name of Vaccinator and Title of Vaccinator. Tap the desired field to enter your information. Note that this information will be saved only to the GFE device you are using. If you log in to the App with your VistA credentials from a different device, you will have to re-enter this information.

## Location & Note Title

There are two fields in the Location & Note Title section of the Immunization Template: Clinic for Immunization and Note Title for Immunization. Enter either a clinic name and note title or select an option from a drop-down menu that appears when you start typing. Note that this information will NOT be stored in the App or associated with your VistA credentials and will need to be re-entered each time you launch the Immunization Campaign App, regardless of device or user.

The screenshot shows the 'IMMUNIZATION TEMPLATE' form. At the top left is a 'Back' button. The form is divided into three main sections:

- Vaccinator:** Contains two input fields: 'Name of Vaccinator:' with the value 'MOBILEAPPSPROVIDER, ONE' and 'Title of Vaccinator:' with the placeholder 'Enter your title (required field)'.
- Location & Note Title:** Contains two input fields: 'Clinic for Immunization:' with the placeholder 'Enter/Select a Clinic for Immunization...' and 'Note Title for Immunization:' with the placeholder 'Enter/Select a Note Title for Immunization...'.
- Vaccine Profiles:** A header with a '+' button on the right. Below it, the text reads 'No vaccine profiles exist.'

At the bottom of the form is a navigation bar with three buttons: 'Launchpad', 'Home', and 'Logout'.

## Vaccine Profiles

There are four possible actions you can perform in the Vaccine Profiles section:

1. Create a Vaccine Profile
2. Use an existing Vaccine Profile
3. Edit an existing Vaccine Profile
4. Delete a Vaccine Profile

## Creating a Vaccine Profile

By creating a Vaccine Profile that includes the general information about the vaccine, you can re-use the data the next time you administer the vaccine instead of re-entering the information for every patient. Tap the + button on the right side of the Vaccine Profiles header > A New Vaccine Details screen will pop up > Enter data into each field:

- Select the Vaccine Type from the drop-down menu > The VIS URL field will auto-populate.
- Select the Trade Name from the drop-down menu > The Manufacturer, Route and Dose will auto-populate.  
**NOTE:** You cannot have two vaccines with the same Trade Name/Manufacturer.
- Type the Lot Number into the available field.
- Choose the Expiration Date from the drop-down menu for Month, Day and Year.

To save your new vaccine profile, tap the **Save** button at the bottom of the template > A pop-up window will appear that requests you re-enter the Lot Number for security purposes (to ensure the Lot Number has been entered correctly) > Re-enter the number on the New Vaccine Profile template > Tap the **Save** button again > You will be taken back to the Vaccine Profiles screen. To discard the New Vaccine Profile, tap the **Cancel** button at the bottom of the template.

## Using an existing Vaccine Profile

After you've created a Vaccine Profile, remember to use it again the next time you administer the vaccine to save you time as you record the immunization. Tap Immunization Template from the Home screen menu > Under the Vaccine Profiles heading, tap the box in the Use in Campaign column next to the name of the Vaccine Profile you would like to select > A check mark will appear.

**NOTE:** You must select an existing vaccine before you will be able to administer it to a patient.

## Editing an existing Vaccine Profile

Follow the instructions above for using an existing Vaccine Profile > Tap the > button on the far right side of the same line > You will be taken to the Vaccine Details screen that you previously created > Tap the **Edit** button at the bottom of the template > A pop-up window will appear that asks you to confirm that you wish to change the information in the profile > Tap **Yes** to continue (or **No** to cancel) > Edit the Vaccine Profile as necessary > Save as you would a New Vaccine Profile.

## Deleting a Vaccine Profile

Tap Immunization Template from the Home screen menu > Under the Vaccine Profiles heading, tap the Delete button next to the Vaccine Profile header > Tap the red circle next to the Vaccine Profile you wish to delete > Confirm the deletion by tapping the red Delete button on the far right of the Vaccine Profile (or to exit without deleting press Done).

# Viewing and Documenting a Patient's Immunization Data

From your GFE, you can view your patient's comprehensive immunization record and document the steps to administering a vaccine. The information will be recorded directly into your patient's CPRS. From the Home screen, tap **Immunization Documentation**. This screen presents you with two options:

- Immunization Campaign — information about the patient's last influenza vaccination and a questionnaire to help you determine whether to administer the vaccine
- Immunization History — patient's comprehensive immunization record

Tap on the option you would like to view.

## Determining whether to administer a vaccine

When you tap Immunization Documentation, the screen will default to the Immunization Campaign option, which displays the questionnaire to help determine whether to give your patient a vaccine. You must answer all of the questions before you can administer and document a vaccine. Answer the questionnaire by tapping the Yes, No or N/A button that corresponds to each question. Once you have answered the questions, two buttons will appear at the bottom of the screen:

1. Yes (choose vaccine next)
2. No (provide reason next)

**MOBILEAPPSVETERAN, ONE**  
04/07/1935 (79) M  
999-99-9999

**IMMUNIZATION CAMPAIGN**

5. Has the patient ever had a severe reaction to any influenza vaccine?

Yes No

6. Has the patient ever had Guillain-Barre Syndrome?

Yes No

*If patient does NOT have any contraindications, all of the above responses will be submitted as part of the patient's record.  
If the patient DOES have a contraindication and vaccine will NOT be given at this time, close this application and document in CPRS instead. Do not select "No" below; continue to CPRS.*

**Administer vaccine today?**

**Yes**  
(choose vaccine next)

**No**  
(provide reason next)

Launchpad Home Logout

## Choosing a vaccine

After you've answered the questions and chosen to administer a vaccine, you will see a screen with information about flu vaccines and contraindications > Select the vaccine you want to administer from the drop-down menu at the bottom of the screen > Only those vaccines you selected in your Vaccine Profiles screen will be available > Tap the Administer Vaccine button > You will go to the Vaccine Administration screen, which has three sections:

1. Provide VIS (Vaccine Information Statement)
2. Document Vaccination Record
3. Review & Sign

To return to the previous screen, tap the **Cancel** button.

The screenshot shows the 'IMMUNIZATION CAMPAIGN' app interface. At the top left, there is a search icon, the text 'MOBILE APPS VETERAN, ONE', the date and time '04/07/19 35 (79) M', the phone number '999-99-9999', and a home icon. The main title is 'IMMUNIZATION CAMPAIGN'. Below this, a warning message states: 'The LAIV4 influenza nasal vaccine (FluMist) should not be administered to:'. This is followed by a bulleted list of contraindications:
 

- Pregnant women
- Any of the following adults:
  - persons with a history of hypersensitivity, including anaphylaxis, to any of the components of LAIV;
  - persons with history of any egg allergy even if not severe or not anaphylactic;
  - persons with asthma;
  - persons aged ≥ 50 years;
  - those with chronic pulmonary, cardiovascular (except isolated hypertension), renal, hepatic, neurologic/neuromuscular, hematologic, or metabolic disorders;
  - those who have immunosuppression (including immunosuppression caused by medications or by HIV);
  - persons who care for severely immunosuppressed persons who require a protective environment (given the theoretical risk for transmission of the live-attenuated vaccine virus).

 Below the list, a link is provided: 'For additional details, consult the VHA Influenza Guidance Statement at [http://vaww.prevention.va.gov/2013\\_2014\\_Seasonal\\_Influenza\\_Immunization.asp](http://vaww.prevention.va.gov/2013_2014_Seasonal_Influenza_Immunization.asp).'
   
 Underneath the warning, there is a 'Choose Vaccine:' label and a dropdown menu currently displaying 'FluBlok (RIV3) - 1234'. At the bottom of the main content area are two buttons: 'Administer Vaccine' (in a dark blue box) and 'Cancel' (in a light grey box). The bottom navigation bar contains three items: 'Launchpad', 'Home', and 'Logout'.

## Providing the Vaccine Information Statement (VIS)

Before administering a vaccine, federal law requires health care providers to give patients a VIS developed by the CDC that explains a vaccine’s benefits and risks. Therefore, the first step to documenting information in your patient’s vaccination record is to provide the patient with a paper or electronic copy of the VIS – or confirm prior receipt. If you provide the VIS electronically, proceed by viewing the information on the Provide VIS screen, which will give you an option to email an electronic copy > Type the patient’s email address into the available email field > Tap Send > Tap the Next button on the bottom of the screen to continue to the Document Vaccination Record screen. If you provide the information physically, leave the email field blank and tap Next. If you wish to cancel, tap Cancel to return to the previous screen > Tap Yes in the pop-up box that appears to confirm you would like to cancel.

**NOTE:** Providing the patient with the VIS is a legal requirement.

MOBILEAPPSVETERAN, ONE

## Documenting information in a Vaccination Record

The second step to documenting information in your patient’s vaccination record is to enter or verify the following information on the Document Vaccination Record screen:

- In the Visit Related To section, tap **Yes** or **No** to indicate whether the patient’s visit is related to any of the listed service-related issues.
- In the Vaccination Record section, the vaccination information you provided will pre-populate. Edit the Dose or Lot Number by tapping the **Edit** buttons above the information.
- Select the injection site for the vaccine from the available drop-down menu in the Injection Site section.
- Type any additional comments or notes into the available Comments/Notes field. Your answers to the questionnaire will be automatically incorporated.

Tap the **Next** button on the bottom of the screen to continue to the **Review & Sign** screen or tap the **Back** button to return to the previous screen.

## Electronically signing a Vaccination Record

The final step to documenting information in your patient's vaccination record is to save the data to VistA by entering your Electronic Signature Code. On the Review & Sign screen, you will see a final version of the vaccination record information you entered on the previous screen > Tap the Sign & Submit button at the bottom of the screen > Enter your VistA password (Verify Code) and your Electronic Signature Code in the pop-up box that appears > Tap **OK** to confirm. If you do not wish to sign the Vaccination Record, tap **Cancel** > Tap Yes from the pop-up box to confirm you want to cancel and return to the previous screen.

# Choosing Not to Administer a Vaccine

If you choose not to administer a vaccine after you have completed the questionnaire on the Immunization Campaign screen, tap the **No** button at the bottom of the screen. You will go to a screen that asks you to document why you chose not to administer the vaccine. You can choose:

1. Received vaccine elsewhere
2. Influenza vaccine refused

Select the reason the vaccine was not administered from the available drop-down menu > Tap **Document Reason Details** to continue. To return to the previous screen, tap **Cancel**.

## Documenting that a patient received a vaccine elsewhere

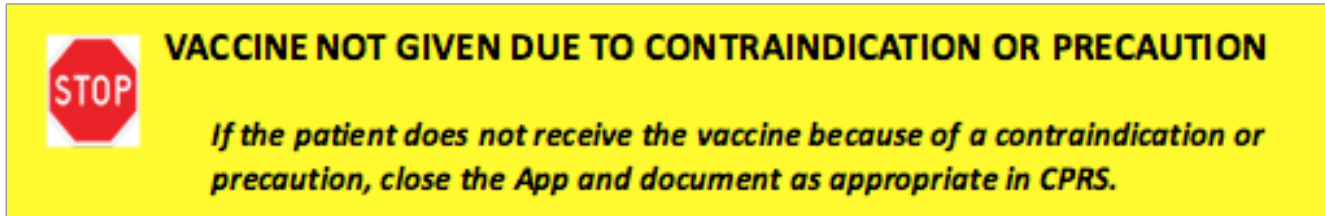

You will see the pop-up Vaccine Received Outside of VA > Insert the date the patient was immunized from the available drop-down menus for Month, Day and Year > Select the type of vaccine administered from the available drop-down menu > Enter the appropriate dose into the Dose field > Enter any additional comments into the Comments/Notes Field > Tap the **Sign & Submit** button at the bottom of the screen > Enter your VistA password (verify code) and your Electronic Signature Code in the pop-up box that appears > Tap **OK** to confirm. To cancel signing the record and to return to the previous screen, tap Cancel on the signature screen > Tap Yes from the pop-up box to confirm the cancelation > You will return to the previous screen.

## Documenting that a patient refused a vaccine

You will see the pop-up Document Refusal of Influenza Vaccine > Enter the reason for refusal in the Comments/Notes field > Tap the Sign & Submit button at the bottom of the screen > Enter your VistA password and your Electronic Signature Code in the box that appears > Tap OK to confirm. To cancel signing the record and to return to the previous screen, tap Cancel on the signature screen > Tap Yes from the pop-up box to confirm cancellation > You will return to the previous screen.

## Documenting contraindications

You should only select Influenza vaccine refused if the vaccine is refused without contraindications. If there is a contraindication, close the Immunization Campaign App and document that information in your patient's CPRS.

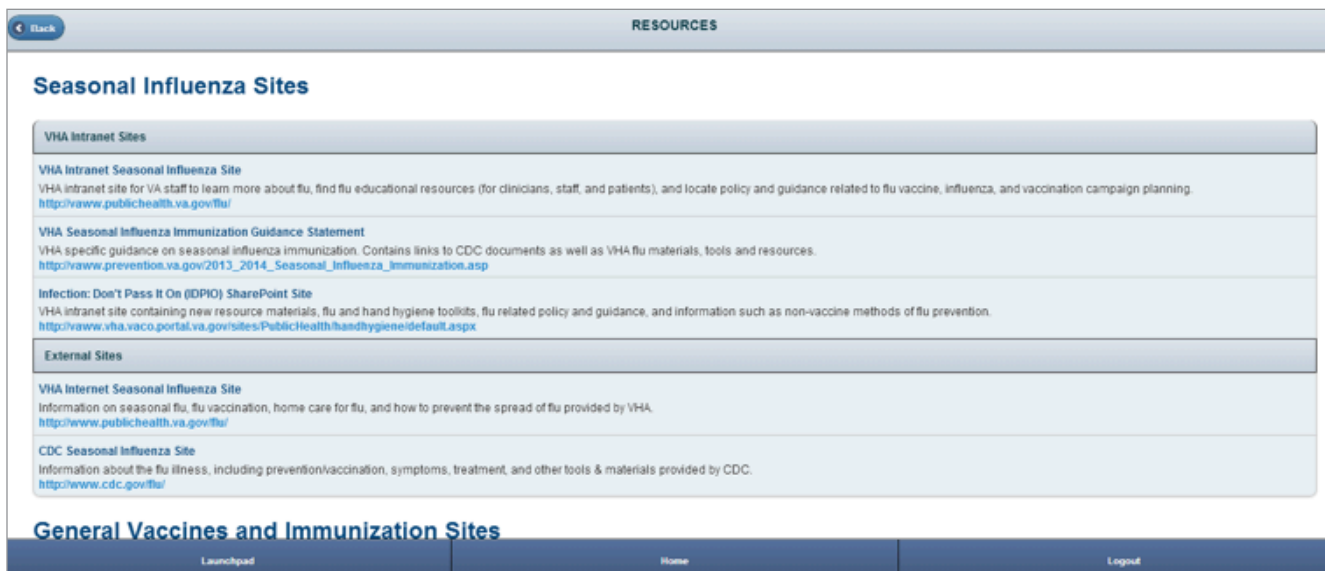

**VACCINE NOT GIVEN DUE TO CONTRAINDICATION OR PRECAUTION**

*If the patient does not receive the vaccine because of a contraindication or precaution, close the App and document as appropriate in CPRS.*

## Resources

The Resources screen is one of the four main sections on the Immunization Campaign App Home screen. The section provides links to intranet sites within the Veterans Health Administration (VHA) and to external resources with information about seasonal flu and vaccines in general. To go to the Resources screen, tap the **Resources** button from the Home screen > Choose to browse resources from either VHA Intranet Sites or External sites.

**RESOURCES**

### Seasonal Influenza Sites

**VHA Intranet Sites**

**VHA Intranet Seasonal Influenza Site**  
VHA intranet site for VA staff to learn more about flu, find flu educational resources (for clinicians, staff, and patients), and locate policy and guidance related to flu vaccine, influenza, and vaccination campaign planning.  
<http://www.publichealth.va.gov/flu/>

**VHA Seasonal Influenza Immunization Guidance Statement**  
VHA specific guidance on seasonal influenza immunization. Contains links to CDC documents as well as VHA flu materials, tools and resources.

### General Vaccines and Immunization Sites

Launchpad Home Logout

# About

The User Guide is accessible from the About section on the App Home screen and provides a step-by-step guide for how to use the App. To access the built-in User Guide, tap the **About** button on the Home screen and then tap the **User Guide for Immunization Campaign App** button.

## Help and Additional Information

### Additional Training Materials for the Immunization Campaign App

More resources, such as a Quick Start Guide, Slideshow, and FAQs, can be found on [mobilehealth.va.gov/training](http://mobilehealth.va.gov/training).

### Help Desk Information

If you need help with the Immunization Campaign, dial **1-855-500-2025** to speak with a VA representative. The Help Desk is open weekdays from 7 a.m. to 7 p.m. CT. For TTY assistance, dial 711.

### Emergencies

You should never use this App in an emergency. If you encounter an emergency, call your local medical center or dial 911. If you feel your information may have been compromised, contact your local VA facility to obtain the contact information for your Privacy Officer. To locate your local VA facility, visit VA's Facility Locator: [va.gov/directory/guide/home.asp?isflash=1](http://va.gov/directory/guide/home.asp?isflash=1).

# Appendices

## Appendix #1: Project References

The Immunization Campaign App is part of a suite of Apps currently being field tested through the VA Mobile Health Provider Program. Participants include clinicians at up to 18 VAMCs.

The App was developed by AgileX [www.agilex.com] and was tested in a pre-production environment to ensure optimal functionality.

## Appendix #2: Glossary

**App** – an application, or software program, that can be accessed through a website or mobile device and is designed to fulfill a particular purpose

**CDC** – Centers for Disease Control and Prevention

**Computerized Patient Record System (CPRS)** – electronic medical record applications and databases that provide a complete overview of patient’s medical records

**Contraindication** – a specific situation in which a drug, procedure or surgery should not be used because it may harm a patient

**Current Procedural Terminology (CPT)** – A medical code set copyrighted and maintained by the American Medical Association that describes medical, surgical and diagnostic services and is designed to communicate uniform information about medical services and procedures among physicians, coders, patients, accreditation organizations and payers for administrative, financial and analytical purposes

**CWAD** – crisis, warnings, allergies and/or adverse reactions and directives

**Electronic Health Record (EHR)** – a digital record of a patient’s treatment plan and health care interactions with his or her providers

**Electronic Signature Code** – User’s electronic signature code contains encrypted code, which the user types when signing documents electronically in VistA and/or CPRS.

**Government Furnished Equipment (GFE)** – Secure equipment, such as mobile devices, that is obtained by and belongs to the government (VA), and is made available to contractors and employees who have undergone background checks and information security trainings

**VAMC** – VA Medical Center

**VA Mobile Health** – an initiative that aims to improve the health of Veterans by providing technologies that will expand care beyond the traditional office visit and includes the creation of secure mobile Apps that will leverage the popularity of wireless technologies to support Veterans, Caregivers and VA clinical teams [More at: [mobilehealth.va.gov](http://mobilehealth.va.gov)]

**Vaccine Information Statement (VIS)** – Information issued by the CDC about a vaccine’s risks and benefits that providers are required to provide patients before administering a vaccine

**Veterans Health Information Systems and Technology Architecture (VistA)** – An enterprise-wide information system built around an Electronic Health Record (EHR), used throughout the United States Department of Veterans Affairs (VA) medical system, known as the Veterans Health Administration (VHA). It consists of nearly 160 integrated software modules for clinical care, financial functions, and infrastructure.

## Appendix #3: CPRS Prerequisites

Provides list of required prerequisites for deploying the Immunization Campaign App at the specific VA Hospital (**VistA**) location.

At the local **VistA** site (the location of the server which the user connects to when logging into **CPRS**), where the Immunization Campaign App is deployed, it is imperative that local **VistA (CPRS)** is properly configured/set-up with proper “codes”.

In order to successfully submit patient’s immunization record via Immunization Campaign App, please verify (and if applicable, apply necessary patch/updates)\*\* the items for the local **VistA (CPRS)** site where the App will be used.

**TABLE 1 - CPRS PREREQUISITES PREPARATION**

CPRS Data	Value	Notes
<b>User/VistA Credentials</b> <ul style="list-style-type: none"> <li>Access Code</li> <li>Verify Code</li> <li>VA Location (VistA)</li> <li>Provider’s Electronic Signature Code</li> </ul>	<ul style="list-style-type: none"> <li>CPRS Access Code</li> <li>CPRS Verify Code</li> <li>Station (e.g. DC VAMC)</li> <li>Electronic Signature Code of the Provider the user belongs to.</li> </ul>	
<b>Primary Diagnosis Code</b>	V04.81	<i>Code for Immunization</i>
<b>Secondary Stop Code -DSS ID</b>	710 (Flu/Pneumococcal Vaccination)	<i>Secondary Stop Code to properly credit the workload</i>
<b>National / Enterprise Note Title</b>	IMMUNIZATION NOTE	<i>Map local Note Title to this Enterprise Note Title.</i>
<b>Health Factor</b>	INFLUENZA VACCINE REFUSED	<i>Used for capturing refusal of vaccination.</i>

**TABLE 2 - CPT codes**

CPT Code	Description	Notes
<b>90471</b>	For immunization administration for patients over 18 years of age or for immunization administrations performed by an office nurse who is allowed by applicable statute or regulation to explain the risks and benefits of vaccines, codes 90471-90474 should be reported	<b>CPT 90471</b> is also applied, in addition to the CPT for the vaccine given.
<b>90654</b>	Influenza virus vaccine, split virus, preservative-free, for intradermal use	<b>CPT 90471</b> is also applied, in addition to the CPT for the vaccine given.
<b>90656</b>	Influenza virus vaccine, trivalent, split virus, preservative free, when administered to individuals 3 years and older, for intramuscular use	<b>CPT 90471</b> is also applied, in addition to the CPT for the vaccine given.
<b>90658</b>	Influenza virus vaccine, trivalent, split virus, when administered to individuals 3 years of age and older, for intramuscular use	<b>CPT 90471</b> is also applied, in addition to the CPT for the vaccine given.
<b>90661</b>	Influenza virus vaccine, derived from cell cultures, subunit, preservative and antibiotic free, for intramuscular use	<b>CPT 90471</b> is also applied, in addition to the CPT for the vaccine given.
<b>90662</b>	Influenza virus vaccine, split virus, preservative free, enhanced immunogenicity via increased antigen content, for intramuscular use	<b>CPT 90471</b> is also applied, in addition to the CPT for the vaccine given.
<b>90672</b>	Influenza virus vaccine, Quadrivalent, live, for intranasal use	<b>CPT 90471</b> IS NOT applied.
<b>90673</b>	Influenza virus vaccine, Recombinant Hemagglutinin Antigens, for intramuscular use	<b>CPT 90471</b> is also applied, in addition to the CPT for the vaccine given.

\*\* Latest Lexicon patch may be required and applied to the CPRS/VistA in order to have all values listed per Table 11.

CPT Code	Description	Notes
90686	Influenza virus vaccine, Quadrivalent, split virus, preservative free, when administered to individuals 3 years of age and older, for intramuscular use	<b>CPT 90471</b> is also applied, in addition to the CPT for the vaccine given.
90688	Influenza virus vaccine, Quadrivalent, split virus, when administered to individuals 3 years of age and older, for intramuscular use	<b>CPT 90471</b> is also applied, in addition to the CPT for the vaccine given.
