

New Patient Education Videos Are Available for Veterans and VA Care Team Members

Watch Patient Education Videos about the Proper Use of Medication Delivery Devices

Health care providers want to ensure their patients are correctly using prescribed medications and their associated devices. Patients need to have quick access to tutorials on how to properly use devices when they are not with their provider. In response, VHA Innovation collaborated with VHA Pharmacy Benefits Management Services and Employee Education System (EES) to develop nine videos in both English and Spanish that show Veterans how to properly use devices so medications are delivered correctly. Providers can use these videos as a tool to help educate their patients. To learn more about these videos check out the [Connected Care Messenger Blog](#).

Preconception Care

Caring4Women Veterans

- **Preconception Care** provides actionable information to integrate preconception care into primary care visits. Additional training materials and resources can be found on the Preconception Care App page of the [VA Mobile App Store](#).
- **Caring4Women Veterans** is designed to increase care team members' awareness of, and access to, current information about the unique physical and mental health needs of women Veterans. Additional training materials and resources can be found on the Caring4Women Veterans App page of the [VA Mobile App Store](#).

Have You Heard the News? The New Office of Connected Care

Recently, the Connected Health and Telehealth Services offices were merged under a single office named Connected Care. By aligning the two offices' supporting programs - VA Telehealth Services, VA Mobile, My HealthVet, and the VHA Innovation Program, Connected Care now brings together all of VA's digital health technologies under one umbrella to streamline and enhance the services we provide to Veterans. The new Connected Care office will continue to enable VHA to make good on its promise to deliver high-quality, Veteran-centered care, optimize individual and population health, advance health care that is personalized and proactive, and enhance the health care experience through virtual modalities of care.

Questions?

If you have any questions or would like any communications materials developed about this program, contact [VHA10P8 Communications \(VA Staff\) mailgroup](#).
