Learning Objectives

- Explain the purpose and functions of the Mental Health Checkup app.
- Identify how to access additional resources to support clinical integration of Mental Health Checkup.
- Using the provided implementation toolkit and resources, apply recommended steps for the integration of Mental Health Checkup into clinical practice.

Veteran Mental Health

Health care utilization of veterans (FY15; N=1,218,857) (and ICD-9 CM categories):

- **Pain:** Musculoskeletal ailments (principally joint and back disorders) (780-739) – 62.3%
- **Mental health:** Mental disorders (290-319) – 58.1%

Most frequently reported severe symptoms in Veterans (Kang et al 2000, N=30,000):

- **Pain:** headaches (54%), muscle pain (33%), joint pain (45%), back pain (44%)
- **Sleep:** unrefreshing sleep (47%), difficulty sleeping (37%), fatigue (38%), excessive sleepiness (30%)
- **Mental health:** anxious (45%), depressed (36%)

Veteran Mental health care utilization (FY15; N=708,062) (and ICD-9 CM categories):

- **PTSD** (309.81) – 55.5%
- **Depression:** Depressive Disorders (311) – 45.4%
- **Anxiety:** Neurotic Disorders (300) – 43.7% (anxiety, dissociative, and somatoform disorders)

Additional Mental Health Statistics:

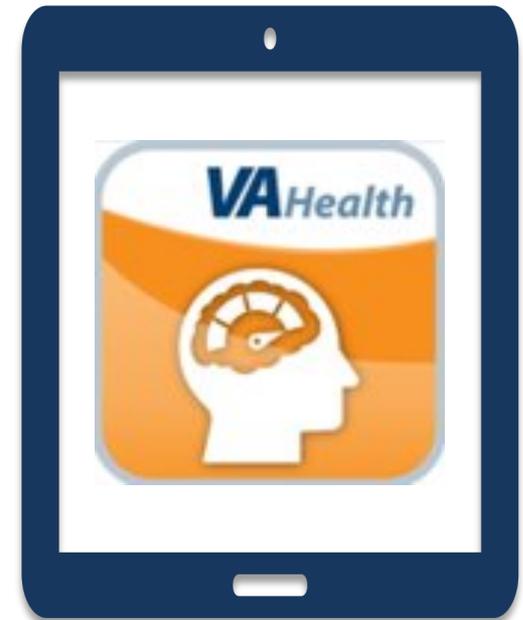

- In an analysis among current and former U.S. military personnel who were included in the Millennium Cohort Study and observed from July 1, 2001 to December 31, 2008, the **risk of suicide** increased in men and in those who were **depressed**. (Kessler RC, Heeringa SG, Stein MB, et al. , 2014)
- In fiscal year 2015, among Veterans served by the Veterans Health Administration (VHA), the documented prevalence of any **depression** (including depression not otherwise specified) was 19.8% while the documented prevalence of MDD only was 6.5%. (Gadermann AM, Engel CC, Naifeh JA, et al. 2013)

Mental Health Checkup Overview

Mental Health Checkup Key Functionalities:

- **Mental Health Checkup** (MH Checkup) is a **web-based application** that supports the implementation of *measurement-based care* for Veterans with various mental health conditions
- MH Checkup includes both **Veteran and Provider** facing apps

Key Features

- Assessments – Assign assessments, view results, and provide feedback to Veterans
- Alerts – Receive alerts for assessments with high scores
- Notifications – Track completed assignments or assignments ended by another provider
- Tracking – View assessments over time as a graph or view individual assessment details

Supports Measurement Based Care

- Mental Health Checkup supports measurement-based care for Veterans with various mental health conditions.
- Measurement-based care (MBC) uses quantitative data to enhance care and to empower Veterans and providers to collaborate on goal-setting and treatment planning.
- Through the app, VA providers can engage Veterans in their own care with assessments to diagnose symptoms and evaluate levels of distress.
- Want to learn more about MBC? You can find out more at:
<https://vaww.portal.va.gov/sites/OMHS/omhostrongpractices/MBC/default.aspx>

MEASUREMENT-BASED CARE In Mental Health

Assessments in Mental Health Checkup

18 assessments currently in Mental Health Checkup v2.4:

1. Alcohol Use Disorders Identification Test (AUDIT)
2. Alcohol Use Disorders Identification Test-Consumption (AUDIT-C)
3. Beck Anxiety Inventory (BAI)
4. Brief Addiction Monitor-IOP version (BAM-IOP)
5. Brief Addiction Monitor-Revised (BAM-R)
6. Brief Resilience Scale (BRS)
7. Eating Attitudes Test-26 (EAT-26)
8. Generalized Anxiety Disorder-7 item (GAD-7)
9. Insomnia Severity Index (ISI)
10. Mental Health Recovery Measure (MHRM-10)
11. PTSD Symptom Checklist (PCL-5)
12. PTSD Symptom Checklist-Weekly (PCL-5 Weekly)
13. Patient Health Questionnaire-9 items (PHQ-9)
14. Quality of Life Inventory (QOLI)
15. Short Warwick-Edinburgh Mental Well-Being Scale (SWEMWBS)
16. Veteran Rand – 12 item survey (VR-12)
17. Working Alliance Inventory (WAI-SR)
18. WHO Disability Assessment Schedule (WHODAS 2.0-12)

MHC for Care Teams: Home Page

The screenshot shows a web application interface for 'Mental Health Checkup'. At the top, there is a dark navigation bar with the title 'Mental Health Checkup' on the left and a menu with 'Home', 'Assessments' (with a dropdown arrow), 'About', 'Feedback', and 'Help' on the right. Below this is a light gray header area containing the 'VAHealth' logo on the left and the user name 'Armstrong, Christina' with a dropdown arrow on the right. A second dark navigation bar is positioned below the header, repeating the 'Mental Health Checkup' title and the 'Home', 'Assessments', 'About', 'Feedback', and 'Help' menu items. The main content area is titled 'Home' and features a prominent 'Assign Assessments' button with a pencil icon and the text 'Create assessment assignments for patients.' To the right of this button is a blue chevron arrow. Below the button, a paragraph of text explains that the tabs below provide notifications on completed assessments and, when applicable, if an assignment has been ended by another provider. It also notes that completed assessments with a score of HIGH will be displayed under the Alerts tab, while others will appear under the Completed tab. At the bottom of the main content area, there are two tabs: 'Alerts' (with a bell icon) and 'Completed' (with a checkmark icon). The 'Completed' tab is currently selected. Below the tabs, a message states: 'There are no alerts on assessments at this time.'

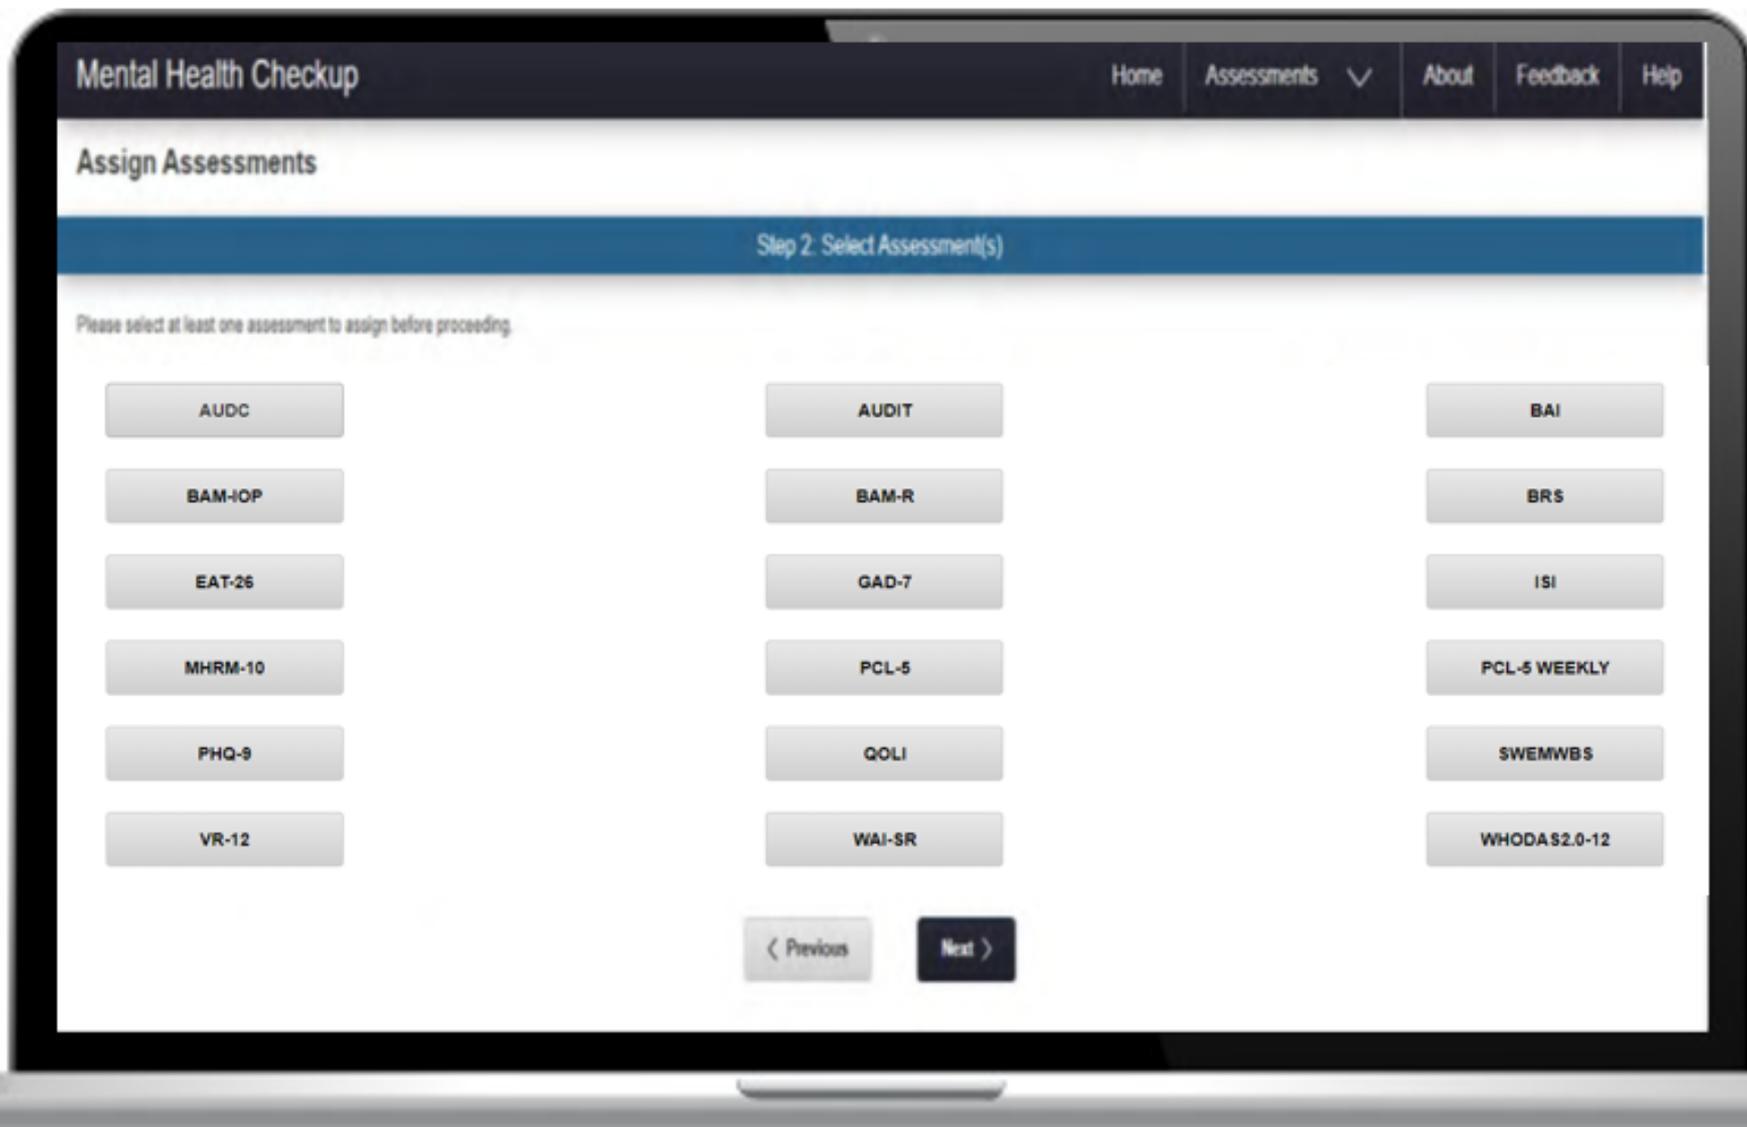

MHC for Care Teams: Selecting a Patient

The screenshot displays the VA Health Mental Health Checkup interface. At the top, there is a dark navigation bar with the text "Mental Health Checkup" on the left and "Home", "Assessments" (with a dropdown arrow), "About", "Feedback", and "Help" on the right. Below this is a light gray header with the "VAHealth" logo on the left and the user name "Armstrong, Christina" with a dropdown arrow on the right. A second dark navigation bar is present, identical to the first. The main content area is titled "Assign Assessments" and features a prominent blue banner that reads "Step 1: Select Patient(s)". Below the banner is a gray button labeled "Add Patient". Underneath is a section titled "Selected Patient(s) List" which contains the message "Please add at least one patient before proceeding." At the bottom center of the interface is a gray button labeled "Next >".

MHC for Care Teams: Assigning Assessments

After a Veteran completes an assessment, you can view completed assessments for a single Veteran or view all completed assessments by **Assessment Name**. Data for a single Veteran can also be viewed in **Score Severity Detail** or **Historical Graph** format.

View Completed Assessments

To begin, search for a patient. After your selection, the page will refresh so you can view assigned assessments for the selected patient.

▲ Showing assignments for patient. Select to change criteria.

In the event a Veteran answers anything other than "Not at All" for Question 9 on the PHQ-9 assessment, the assigning provider and the Veterans Crisis Line (VCL) will be notified immediately via email*

*The VCL will then contact the Veteran and follow the VCL protocol. To ensure Veterans are aware of this process, **providers should refer to the PHQ-9 Script before assigning the PHQ-9 in MH Checkup.**

MHC for Care Teams: Frequency of Assessments

Assignments Assigned...

- Once or Daily must be taken on the exact assignment date. Note: A future version of MH Checkup will allow providers with an option to set a specific start and end date for assigned assessments.
- Weekly can be taken up to 3 days earlier than the assignment date, or up to 3 days later than the assignment date
- Bi-weekly can be taken up to 6 days earlier than the assignment date, or up to 7 days later than the assignment date
- Monthly can be taken up to 13 days earlier than the assignment date, or up to 14 days later than the assignment date
- Quarterly can be taken up to 44 days earlier than the assignment date, or up to 45 days later than the assignment date
- Semi-annually or annually can be take up to 45 days earlier than the assignment date, or up to 45 days later than the assignment date

Note: If an assessment is not taken, then the assessment will be marked as missed in the database and be removed from both the Veteran and provider apps without any specific notification.

If an assessment is "past due" - i.e. after the assignment date, but before the last day it can be taken, it is shown in the Veteran's Due tab and can be taken; however, it will not show in the Alerts tab of the Provider home screen.

If the Veteran answers anything other than “Not At All” on Question 9 in the PHQ-9 Assessment, the Veteran will receive an alert to follow up with their provider and/or contact the Veteran Crisis Line (VCL). The VCL will immediately contact the Veteran.

MHC: PHQ-9 Provider Script

Providers are encouraged to inform Veterans about the MH Checkup PHQ-9 VCL process **before** assigning the PHQ-9 assessment. The script below is provided as a resource to help guide conversations with Veterans.

"Hello Veteran,

*I will be assigning you the PHQ-9 assessment on the Mental Health Checkup web application. You will receive an email from DoNotReply@va.gov with a link to the application. Please login using your My HealthVet Premium, ID.me or DS Login credentials and complete the assessment by (*insert assignment due date or assignment frequency*). For more information on how to complete the assessment, please review the Veteran Quick Guide document.*

*When you finish the questions, you will get a score. **Please be aware that certain answers may lead to the Veteran Crisis Line and your provider being contacted. If the Veteran Crisis Line is contacted, they will reach out to you.** Do you have any questions or concerns?"*

Office of Connected Care

MHC for Veterans: How to Access

- Veteran receives an email once assessments are assigned.
- They can also log into MHC for Veterans anytime at:
<https://mobile.va.gov/app/mh-checkup-veterans>
- Requires authentication to log-in (via My Health^eVet Premium login, DS login, or ID.me)
- Find out more at: <https://www.myhealth.va.gov/mhv-portal-web/upgrading-your-my-healthvet-account-through-in-person-or-online-authentication>

The screenshot shows the app page for "VA Mental Health Checkup for Veterans". It features the VA Health logo, a brain icon, and a "Launch in Browser" button. Below the main title, there are four tabs: "Description", "Training Materials", "FAQs", and "Feedback to VA".

The screenshot shows the "Department of Veterans Affairs Identity Provider Selection" screen. It asks the user to "Please select how you would prefer to log in:" and offers three options: "ID.me" (Use your ID.me account), "DSLogon" (Use your DSLogon Level 2 account), and "My Health^eVet Premium Account" (Use your My Health^eVet Premium Account).

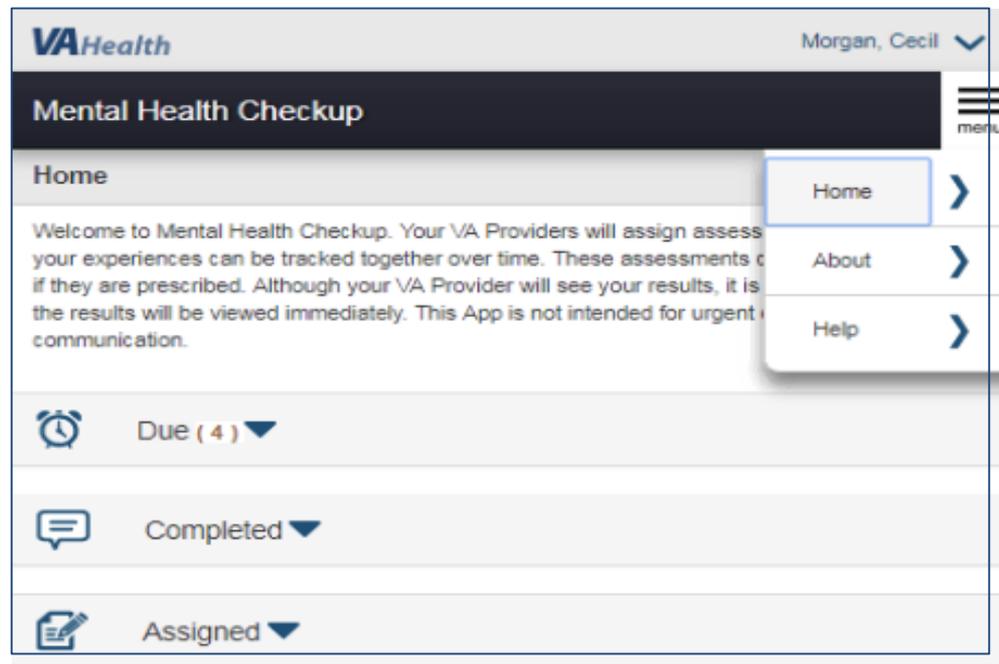

- The Mental Health Checkup application allows Veterans to complete mental health assessments assigned to them by their provider
- Veterans can use the app to **take assessments, obtain scores, receive alerts, view assignment details** and **view provider feedback**
- Self-assessment results are available in **real time** to the Veteran

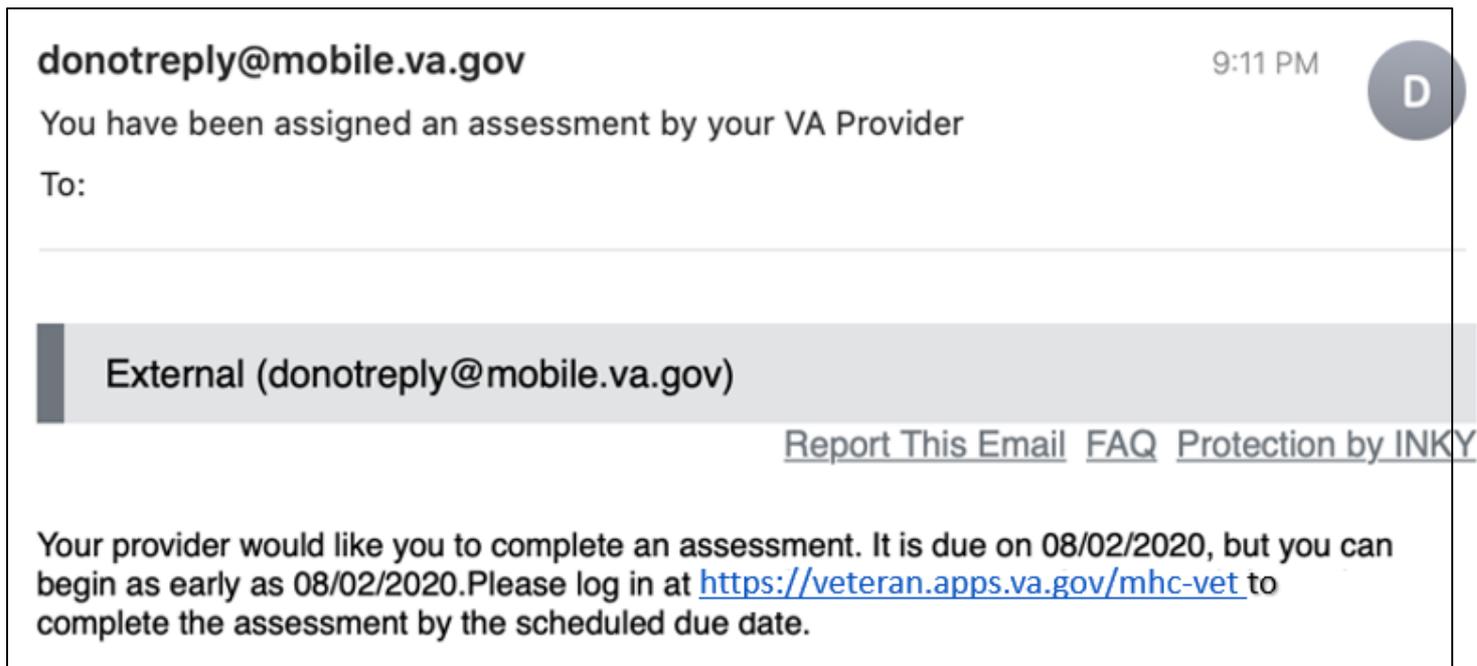

The Veteran application home screen offers three primary functionalities:

- **Due:** displays assessments assigned to the Veteran that are ready for completion
- **Completed:** displays assessments that have been completed
- **Assigned:** displays the upcoming assessments assigned to the Veteran that are not yet due. *For informational purposes only.*

Veteran(s) will receive an email notification when an assessment is assigned.
This email will come from donotreply@mobile.va.gov.

Veterans may also access MH Checkup using the direct link shared with them by their provider via Secure Messaging or the *Veteran Quick Guide*: <https://veteran.apps.va.gov/mhc-vet>

Once the assessment is submitted, it is scored, saved, and available to the Provider. A confirmation page will appear showing the assessment score severity that is calculated based on the answers provided. Using the **Completed** tab, Veterans can also review results in a historical graph format.

VAHealth Patientstkyone, MHPRO

Mental Health Checkup

Generalized Anxiety Disorder, 7 items (GAD-7)

✓ Thank you. Your assessment has been submitted to your provider. Please note that your provider may not see this right away.

Score Severity

Mild

You reported several symptoms of anxiety. Although your symptoms are in the mild range, they can have a major impact on many parts of your life. **You are advised to discuss these concerns with your mental health provider.**

It is important to note that this self-assessment cannot be used to make a diagnosis of anxiety; only a healthcare professional can do this.

If you are concerned about any illness, regardless of what the assessment shows, you should seek further evaluation from your provider. If you are concerned that you may have a medical emergency or are having thoughts of harming yourself or someone else, call 911, or go immediately to the nearest hospital emergency room for an evaluation.

This is the first time you have completed this assessment.

VAHealth Patienteightytwo, MHPRO

Mental Health Checkup

Generalized Anxiety Disorder, 7 items (GAD-7)

✓ Thank you. Your assessment has been submitted to your provider. Please note that your provider may not see this right away.

Score Severity

Moderate

You reported many of the symptoms of anxiety. These symptoms can be troubling or distressing and it is important to consider how they are affecting your quality of life. Although many veterans/individuals cope well with symptoms like yours, effective treatments for anxiety are available to help reduce your symptoms and improve your quality of life. **You are advised to discuss these concerns with your mental health provider.**

It is important to note that this self-assessment cannot be used to make a diagnosis of anxiety; only a healthcare professional can do this.

If you are concerned about any illness, regardless of what the assessment shows, you should seek further evaluation from your provider. If you are concerned that you may have a medical emergency or are having thoughts of harming yourself or someone else, call 911, or go immediately to the nearest hospital emergency room for an evaluation.

Your score has improved since the last time you took the self-assessment. It is likely that things are bothering you less than before.

[Return to Home](#)

VAHealth Patienteightytwo, MHPRO

Mental Health Checkup

Generalized Anxiety Disorder, 7 items (GAD-7)

⚠ Please follow-up with your provider to discuss assessment results ⚠

Contact your provider directly or
Call the Veterans Crisis Line at 1-800-273-8255 | press 1 📞 or
Text the Veterans Crisis Line at 838255 📱 or
Visit the Confidential Veterans Chat 🗨

Score Severity

High

You reported many of the symptoms of anxiety. These symptoms can be very distressing. Although many veterans/individuals cope well with symptoms like yours, your current report suggests that they may be difficult to cope with right now. **You are advised to discuss these concerns with your mental health provider.**

It is important to note that this self-assessment cannot be used to make a diagnosis of anxiety; only a healthcare professional can do this.

If you are concerned about any illness, regardless of what the assessment shows, you should seek further evaluation from your provider. If you are concerned that you may have a medical emergency or are having thoughts of harming yourself or someone else, call 911, or go immediately to the nearest hospital emergency room for an evaluation.

Your score went up since the last time you took the assessment. It is likely that some things are bothering you more than before. Sometimes feelings get worse before they get better, so just keep working on your plans. An increase in symptoms can be a natural part of the process of recovery.

If a Veteran indicates having thoughts of suicide on the PHQ-9 Assessment, **they will immediately be contacted by the Veterans Crisis Line.**

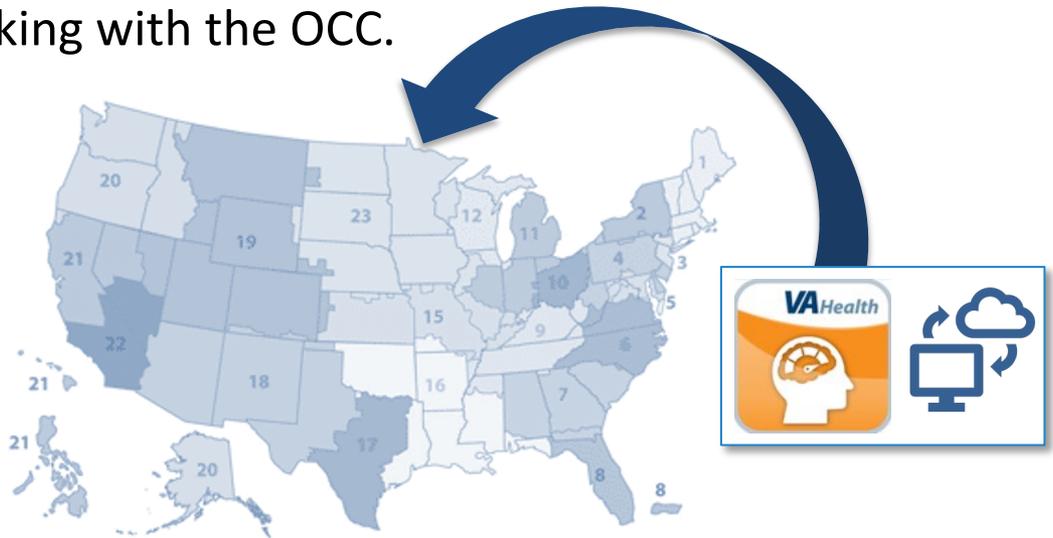

Site Readiness

MH Checkup is available at most facilities except for those listed in the table below. If you would like to implement MH Checkup at your site and **IT IS** listed in the table below, contact the MH Checkup Release Team at VA_MHCheckup@va.gov. Please note that we are working with an OIT point of contact at the sites currently, as our ability to enable MH Checkup is dependent upon local OIT working with the OCC.

Mental Health Checkup

Measurement-Based Mental Health Care Coordination for Veterans

Engage Veterans in their Own Care with Self-Assessments to Measure Symptoms and Evaluate Levels of Distress

Through the Mental Health Checkup app, VA providers can engage Veterans in their own care with assessments to measure symptoms and evaluate levels of distress. VA providers can assign assessments to Veterans, provide feedback, receive alerts on Veteran assessment scores, and receive notifications when Veterans have completed assessments. By using the app, providers can assign assessments and deliver feedback to Veterans outside traditional face to face appointments.

MH Checkup Features at a Glance:

 <p>Assign a variety of self-assessments, including: GAD-7, PHQ-9, PCL-5, ISI, BRS, WHODAS12-2.0, AUDIT-C, PCL-5 Weekly, MHRM-10, AUDIT, BAL, QOLI, SWEMWBS, and VR-12.</p>	 <p>Patient will receive an email notification once an assessment is initially assigned by a provider.</p>	 <p>View patient assessment data compiled over time in handy graphical format. Provide Veterans feedback on their self-assessments.</p>	 <p>In the event a Veteran has a High Score severity on the PHQ-9 Assessment, an alert is immediately sent to the provider and the Veterans Crisis Line.</p>
--	---	--	---

VA  U.S. Department of Veterans Affairs
Veterans Health Administration
Office of Connected Care

All toolkit materials can be found on the MH Checkup SharePoint Site:

<https://vaww.connectedhealth.va.gov/mhd/VAMR/MHCheckup>

Additional Notifications

Message bundling for provider emails.

- Email notifications for assessments will be condensed into a once daily notification for missed and once daily for reminders.
- Completed messages will be sent as is.

Available November 2020!

Assessment Recurrences

Updated assessment recurrence, frequency and duration.

- Allows provider to select a "Response Window."
- For one-time assessments providers can choose to have the response window open for a day, week, two weeks, month, etc.

Available November 2020!

Technical Assistance

Mental Health Checkup for Care Teams:

- If you experience any errors or need help while using Mental Health Checkup, please call the **Office of Connected Care Help Desk (OCCHD) at 1-866-651-3180**
 - The Help Desk is open from 7 a.m. to 7 p.m. CT
 - Please identify yourself as a *Mental Health Checkup* user
- Providers are also encouraged to contact the Mental Health Checkup Release Team at VA_MHCheckup@va.gov with any questions

Mental Health Checkup for Veterans:

- If Veterans experience any errors or need help while using Mental Health Checkup, please direct them to call the **VA Health Resource Center Help Desk at 1-877- 470-5947**
 - The Help Desk is open from 7 a.m. to 7 p.m. CT
 - Please ask them to identify themselves as *Mental Health Checkup* user

To access Mental Health Checkup, follow the links below:

- MH Checkup for Clinicians: <https://staff.apps.va.gov/mhc-provider/>
- MH Checkup for Veterans: <https://veteran.mobile.va.gov/mhc-vet/>

Mental Health Checkup Mailbox:

- Email box to address any user questions.

Mental Health Checkup SharePoint:

- <https://vaww.connectedhealth.va.gov/mhd/VAMR/MHCheckup/SitePages/Home.aspx>

Key Take-Aways

- Mental Health Checkup is a new web-based application that provides a secure platform for VA staff to assign standardized mental health assessments to Veterans, and Veterans to be able to review and track their progress over time.
- Mental Health Checkup is available now at most sites and will soon be available at all sites. The list of assessments available in Mental Health Checkup currently includes 18 assessments and will increase in the upcoming year.
- Mental Health Checkup supports measurement-based care, increases provider understanding of mental health symptoms for patients, and increases patient engagement in care.
